

This program of tables, developed from an elaborate and synthetic geometry, is the epitome of versatility and adaptation to a multitude of environments and workspaces. Radial Conference Table is characterized by its modularity and technology. Its architectural design and distinct technological character adapts to numerous combinations, offering power management integrated into the table's frame.

Este programa de mesas, desarrollado a partir de una geometría trabajada y sintética, es el paradigma de la versatilidad y la adaptación a multitud de entornos y espacios de trabajo. Radial Conference Table se caracteriza por su modularidad y tecnificación. Su diseño arquitectónico y de marcado carácter tecnológico se adapta a multitud de combinaciones, ofreciendo una gestión de las conexiones integradas a su estructura.

### Distribution Distribución

**1. Power boxes distribution:** By standard, the power/data box would be offset relative to the base. For tables with more than one power box, these will be separated 1/3 between them and placed horizontally and longitudinally.

**2. Wire management:** The cable passes through an aluminum wire manager, keeping it hidden from the users.

**3. Wiring exit:** the cable exits directly from the power system or though an aluminum frame so that it is concealed at the bottom of the base. The cable then crosses the aluminum profiles of the legs and is completely hidden until it reaches the floor.
